

ERUS 13-15 September 2023, Florence (IT)**ESU Course 3: Advanced course in robotic cystectomy and diversion**
Thursday 14 September 2023, 08:00-10:30 hrs**Faculty**

P. Wiklund, Stockholm (SE) – chair
C. Wijburg, Arnhem (NL)
A. Minervini, Florence (IT)

Aims and objectives

This course on robot assisted radical cystectomy concentrates on how the key steps of radical cystectomy in males and females can be performed. Different types of urinary diversion with intracorporeal techniques will also be described. Each step will be presented using video clips. Different techniques in nerve sparing male cystectomy as well as organ sparing female cystectomy will also be discussed. During the course, the attendee will obtain a large view on how the different steps of robot-assisted radical cystectomy can be performed, which will enhance the attendee's technical armamentarium to perform the procedure. The course is directed to beginners as well as more advanced robotic surgeons.

08:00 – 08:05 Introduction

P. Wiklund, Stockholm (SE)

08:05 – 08:55 Cystectomy**08:05 – 08:20 Robotic-assisted cystectomy: Step-by-step male**

C. Wijburg, Arnhem (NL)

08:20 – 08:40 Female cystectomy

A. Minervini, Florence (IT)

08:40 – 08:55 Lymphadenectomy

C. Wijburg, Arnhem (NL)

08:55 – 10:00 Diversion**08:55 – 09:10 Intracorporeal urinary diversion: Bricker conduit**

P. Wiklund, Stockholm (SE)

09:10 – 09:40 Neobladder

A. Minervini, Florence (IT)
P. Wiklund, Stockholm (SE)

09:40 – 10:00 Extracorporeal urinary diversion

A. Minervini, Florence (IT)

10:00 – 10:30 Results**10:00 – 10:15 Outcomes after robotic-assisted cystectomy**

P. Wiklund, Stockholm (SE)

10:15 – 10:30 Complications

A. Minervini, Florence (IT)

10:30 Conclusions and consensus
